

Gonzalez Statement on Health Care Repeal Rule

Washington, DC – Congressman Charles Gonzalez (TX – 20) issued the following statement today after House Republicans made the first step in their attempt to repeal the health care reform act:

“Americans who work for a living should be able to take their kids to a doctor and not be denied coverage once they become ill. If Republicans in Congress get their way, insurance companies will again be able to take away protections from children and deny coverage for pre-existing conditions. We will continue to fight against every effort to repeal a health care law that gives benefits to millions of Americans, strengthens our middle class and reduces the deficit.”
